nolte eco

The kitchen is the ROOM OF ROOMS.

We probably live more, and more intensively, here than anywhere else in the home. It is the place where we meet, where we encounter others. As family or friends. As a couple.

We cook, eat and enjoy ourselves in the kitchen. And sometimes we have all the time in the world as we do so.

We argue. And make up again. We read, write, send emails, post messages. And maybe philosophise a little.

And – quite secretly – the kitchen sets the rhythm of our day. GOOD MORNING. THEN MIDDAY. THEN EVENING. And sometimes night …

Which is why we love the kitchen.

Brilliantly simple.
Simply brilliant.

nolte eco stands for uncomplicated design that already combines all the main ingredients FOR LIFE IN THE KITCHEN.

This is where we spend a large part of our life. So what do we need to set it up properly?

nolte eco leave plenty of space for the users‘ own ideas, favourite colours and individual layouts.

Other lifestyles, other kitchens. If you can think it, chances are it can be planned. And that with particular ease. With the 150 grid planning principle.

And in addition, nolte eco offers the highest level of quality down to the tiniest detail.

Light
A lighting system that cannot be seen.
Until you need it.

Variation
Breaking with the norm: the sideboard
height of 1050 mm as a striking
and ergonomically worthwhile addition.

Contour
Worktops are an important design
element, and add an additional contour
to the kitchen.

Order
Nice. Well planned. The cutlery insert that keeps everything in order.

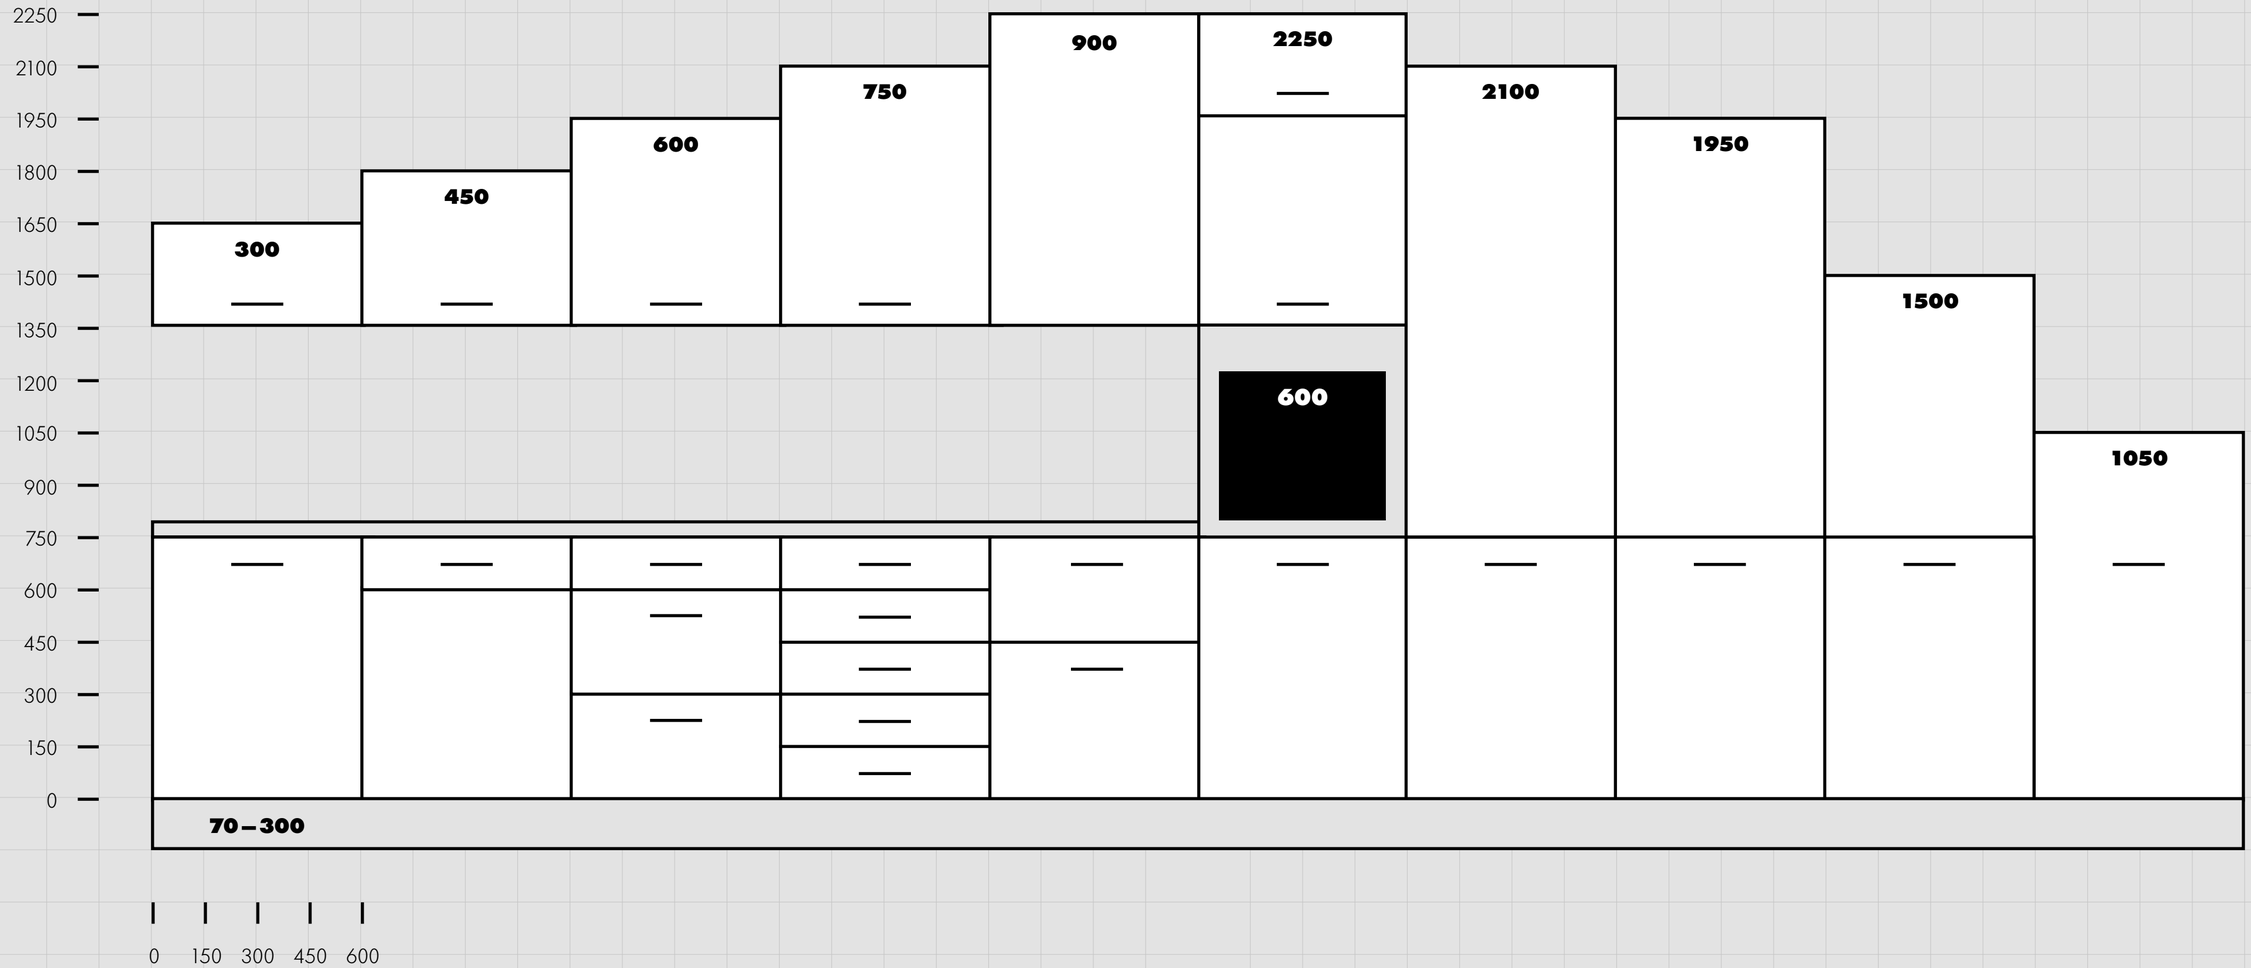
Display
Adds lightness to any kitchen: the wall shelf that holds things and is a decorative feature.

The 150 grid planning principle

All that is required with the 150 grid is a sheet of paper. That's because the planning principle is based on a clever and easy-to-follow dimensioning logic: all widths, heights and even depths can be divided by 150 mm. Which means that all the base and wall units in our range can be combined individually – for a wide range of attractive, practical kitchens with well-balanced proportions in all dimensions.

Ovens ergonomically installed at a height of 600 mm can be integrated here without an interfering panel. And in the 150 mm high drawers of the 150 grid, there's even enough space for ladles and cans.

Brilliantly simple. Simply brilliant.



The size of the idea is much more important than the size of the room.

Everything in the right place. Everything at the right height.

That‘s what ergonomics means.

Openness
Shelves change the kitchen.
They can be little spaces to display
certain items or books.

nolte eco. Life first, then the function. That‘s the basic idea.

What is it that makes a kitchen a personal kitchen? Well, they include the little things that indicate a passion for collection and are brought back from holidays, or perhaps just collected randomly over time.

Functional spaces become living spaces. With function.

Inner values
Everything has its order.
Thanks to the perfect interior organisation.

Design
The 50 mm panels add modern living space highlights.

Space
Extra deep worktops create space.
Including for clever details.
